THE A-Z OF VMD

Clean & Tidy

The photos in our portfolio are not carefully selected; this is what our job sites actually look like – always tidy before, during and after the job.

Careful & concerned

We treat your home as if it were our home. We won't spill stuff or trample your bushes.

Attends to detail

We pride ourselves on attention to detail - before, during and after the job. We will fix things you can't even see before you even notice there is a problem.

Focused on your job

We give you our commitment to finish your job before moving on to the next one. Once we start, we finish.

Safe for your family

You can walk onto the jobsite at any time – there will be no dangerous stuff lying around for your children to trip over.

Lasting results

From the selection of materials to installation, quality and craftsmanship is important in everything we do.

Precise

We do everything with precision and care, even things underground and behind walls – straight, plumb, true.

Thoughtful

We take time to think about the job before we start and we talk with you to make sure you understand what will happen, & what things will look like.

Observant

We notice things about your lifestyle, the other houses in the street, and problems inside the house or the space to be remodeled and take all this into to consideration when planning your work.

Honest

The price we quote is the price you pay. Anticipated problems or concerns are discussed up front and our cost savings are passed on to the customer.

Collaborative

We work with you and your other contractors to get the best result possible in the fastest time.
